Supplier of Quality Force Measuring & Weighing Equipment Since 1932

Dear Valued Customers,

We know that many of you rely on S. A. Meier Company of Milwaukee as a supplier of Material and Force/Torque Testing equipment, Application Engineering support, Onsite Service, and In Lab Calibrations. S.A. Meier is an essential business under Wisconsin's guidelines, and is committed to remaining open through this unusual time.

We continue to monitor the rapidly changing COVID-19 (coronavirus) situation and have taken steps to ensure business continuity to minimize disruptions. We are continuing with our daily in house operations including sales, applications support, calibrations, and repairs.

We are also continuing to provide essential onsite calibration and installation of your equipment, and are following the recommendations of the CDC to protect our employees as well as customers. We understand that many companies are reducing the number of vendors/service personal to come to their facilities and may need to reschedule. We will do everything we can to meet your needs.

If you are in an industry that is slowing down, this is a good opportunity to send in equipment while it is being underutilized.

Best Regards,

S.A. Meier of Milwaukee, Inc.
