Chatillon CS2 Upgrade for CS Series Testers

Product Information

Improvements: Hardware combined with Software

Speed: A new and much faster processor improves button response time, navigation and saving test data. The data collection rate has been vastly improved as well. This can help improve throughput for repetitive testing applications.
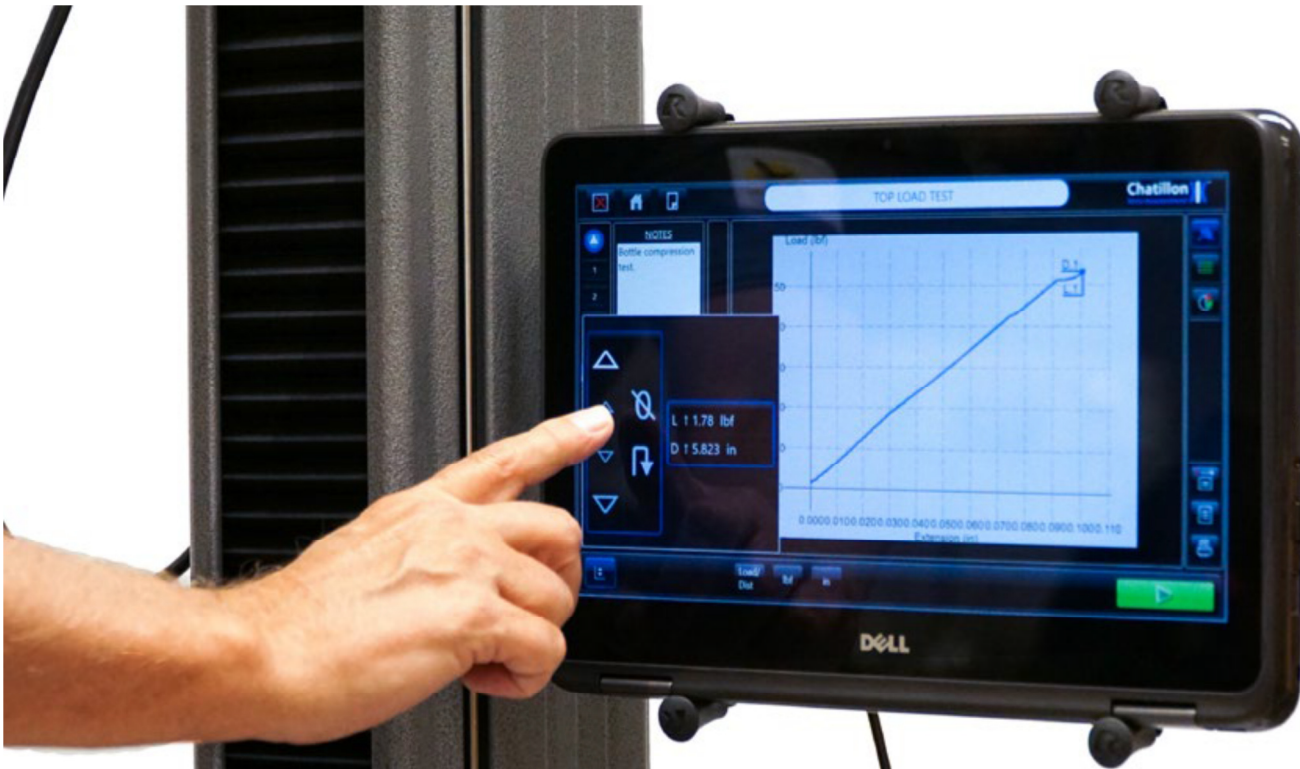

Reliability: Utilizes a solid state hard drive with more memory to store test data. Eliminates the Compact Flash card in your current touch pad computer that is slow and subject to corruption.

Quality: Trusted name brand commercially manufactured computer. Improved up-time so you can count on your tester being available for quality testing.

User Friendly: Windows 10 Professional Operating System makes it much easier to network to store and share results data and a much larger touch screen enables larger buttons and ease of use.

Flexibility: Computer can be mounted to the column and used as a touch-screen or unfolded and used as a conventional laptop computer. This enables the user to set it up in a manner that they are most comfortable with.

Turn Key: Customer installable package includes mounting hardware to mount to your existing tester.

S. A. Meier Co. of Milwaukee, Inc.

Product Information

Hardware: New Touch-Screen Computer Model: 2 in 1 Dell Inspiron 11

- This computer can be used as a folded touch screen or it can be unfolded and used as a lap-top computer that sits next to the tester.
